Foreword	xvii
Acknowledgments	xix
Introduction	xxi

Part I The Basics

<i>Chapter 1</i> First Steps with Microsoft Visual Basic 6	3
---	----------

THE INTEGRATED DEVELOPMENT ENVIRONMENT	3
---	----------

Running the IDE	4
Selecting the Project Type	4
IDE Windows	5
Menus	10
Toolbars	12
The Toolbox	15

YOUR VERY FIRST VISUAL BASIC PROGRAM	18
---	-----------

Adding Controls to a Form	18
Setting Properties of Controls	20
Naming Controls	22
Moving and Resizing Controls	23
Setting the Tab Order	24
Adding Code	26
Running and Debugging the Program	27
Refining the Sample Program	29
Ready, Compile, Run!	31

<i>Chapter 2</i> Introduction to Forms	35
---	-----------

COMMON PROPERTIES	36
--------------------------	-----------

The <i>Left</i> , <i>Top</i> , <i>Width</i> , and <i>Height</i> Properties	36
The <i>ForeColor</i> and <i>BackColor</i> Properties	37
The <i>Font</i> Property	40
The <i>Caption</i> and <i>Text</i> Properties	42
The <i>Parent</i> and <i>Container</i> Properties	43
The <i>Enabled</i> and <i>Visible</i> Properties	43
The <i>hWnd</i> Property	44
The <i>TabStop</i> and <i>TabIndex</i> Properties	45
The <i>MousePointer</i> and <i>MouseIcon</i> Properties	46

Contents

The <i>Tag</i> Property	48
Other Properties	48
COMMON METHODS	50
The <i>Move</i> Method	50
The <i>Refresh</i> Method	50
The <i>SetFocus</i> Method	51
The <i>ZOrder</i> Method	52
COMMON EVENTS	53
The <i>Click</i> and <i>DbClick</i> Events	53
The <i>Change</i> Event	54
The <i>GotFocus</i> and <i>LostFocus</i> Events	55
The <i>KeyPress</i> , <i>KeyDown</i> , and <i>KeyUp</i> Events	55
The <i>MouseDown</i> , <i>MouseUp</i> , and <i>MouseMove</i> Events	58
THE FORM OBJECT	60
Basic Form Properties	61
Fine-Tuning the Performance of Forms	62
A Form's Life Cycle	64
The Controls Collection	70
The Screen Object	70
Printing Text	72
Graphic Methods	76
The <i>DrawMode</i> Property	82
The <i>ScaleMode</i> Property	86
Palette Support	89
 <i>Chapter 3</i> Intrinsic Controls	 91
TEXTBOX CONTROLS	92
Run-Time Properties	93
Trapping Keyboard Activity	94
Validation Routines for Numbers	95
The <i>CausesValidation</i> Property and the <i>Validate</i> Event	98
Auto-Tabbing Fields	101
Formatting Text	101
Multiline TextBox Controls	106
LABEL AND FRAME CONTROLS	108
Label Controls	108
Frame Controls	110
COMMANDBUTTON, CHECKBOX, AND OPTIONBUTTON CONTROLS	111
CommandButton Controls	111
CheckBox Controls	112

Contents

OptionButton Controls	112
Going Graphical	113
LISTBOX AND COMBOBOX CONTROLS	115
ListBox Controls	115
ComboBox Controls	125
PICTUREBOX AND IMAGE CONTROLS	127
The PictureBox Control	127
The Image Control	131
SCROLLBAR CONTROLS	132
DRIVELISTBOX, DIRLISTBOX, AND FILELISTBOX CONTROLS	136
OTHER CONTROLS	138
The Timer Control	138
The Line Control	139
The Shape Control	140
The OLE Control	140
MENUS	141
Accessing Menus at Run Time	143
Pop-Up Menus	144
CONTROL ARRAYS	146
Sharing Event Procedures	147
Creating Controls at Run Time	148
Iterating on the Items of a Control Array	149
Arrays of Menu Items	149
<i>Chapter 4</i> Variables and Procedures	151
SCOPE AND LIFETIME OF VARIABLES	151
Global Variables	152
Module-Level Variables	154
Dynamic Local Variables	154
Static Local Variables	155
OVERVIEW OF NATIVE DATA TYPES	156
The Integer Data Type	156
The Long Data Type	157
The Boolean Data Type	157
The Byte Data Type	158
The Single Data Type	158
The Double Data Type	159
The String Data Type	159
The Currency Data Type	160

Contents

The Date Data Type	160
The Object Data Type	161
The Variant Data Type	162
The Decimal Data Type	165
AGGREGATE DATA TYPES	166
User-Defined Types	166
Arrays	167
Collections	179
Dictionary Objects	185
PROCEDURES	189
Scope	189
Parameter Lists and Return Values	190
Error Handling	198
<i>Chapter 5</i> The Visual Basic for Applications and Visual Basic Libraries	207
CONTROL FLOW	208
Branch Statements	208
Loop Statements	212
Other Functions	214
WORKING WITH NUMBERS	215
Math Operators	215
Comparison Operators	217
Boolean and Bit-Wise Operators	217
Rounding and Truncating	219
Converting Among Different Numeric Bases	219
Format Options for Numbers	220
Random Numbers	222
WORKING WITH STRINGS	223
Basic String Operators and Functions	223
Conversion Functions	225
Find and Replace Substrings	226
Format Options for Strings	229
WORKING WITH DATES AND TIMES	230
Getting and Setting the Current Date and Time	230
Building and Extracting Date and Time Values	232
Date Arithmetic	234
Format Options for Date and Time Values	235

Contents

WORKING WITH FILES	236
Handling Files	236
Handling Directories	238
Iterating Over All Files in a Directory	239
Processing Text Files	241
Processing Delimited Text Files	243
Processing Binary Files	245
The FileSystemObject Hierarchy	248
INTERACTING WITH WINDOWS	258
The App Object	258
The Clipboard Object	260
The Printer Object	265
Running Other Applications	268
Showing Help	271
<i>Chapter 6</i> Classes and Objects	275
THE BASIC CONCEPTS	276
The Main Benefits of OOP	277
Your First Class Module	279
PROPERTIES, METHODS, AND EVENTS	287
Read-Only and Write-Only Properties	287
Advanced Uses of Methods	294
Advanced Uses of Properties	297
The <i>CallByName</i> Function	308
Attributes	310
THE INNER LIFE OF OBJECTS	317
What an Object Variable Really Is	317
Under the Objective Hood	319
Revisiting Object Keywords	325
The <i>Class_Terminate</i> Event	328
<i>Chapter 7</i> Events, Polymorphism, and Inheritance	333
EVENTS	333
Events and Code Reusability	334
Syntax for Events	335
A First, Complete Sample Application	337
Improving the Sample Application	342
Multicasting	349

Contents

POLYMORPHISM	356
Leveraging Polymorphism	356
Working with Interfaces	362
INHERITANCE	370
Inheritance Through Delegation	370
Inheritance and Polymorphism	374
The Benefits of Inheritance	377
OBJECT HIERARCHIES	378
Relationships Among Objects	378
Collection Classes	381
Full-Fledged Hierarchies	386
The Class Builder Add-In	390
<i>Chapter 8</i> Databases	393
THE DATA ACCESS SAGA	393
ODBC	394
DAO	398
RDO	399
ODBCDirect	399
OLE DB	400
ADO	400
VISUAL DATABASE TOOLS	402
The DataView Window	402
The Database Diagram Window	409
The Query Builder Window	411
ADO DATA BINDING	413
The Binding Mechanism	414
Working with Bound Controls	416
The ADO Data Control	418
Formatting Data	421
The Data Form Wizard	427
THE DATAENVIRONMENT DESIGNER	428
Connection Objects	429
Command Objects	430
Data Binding with the DataEnvironment Designer	433
Hierarchical Commands	436
CRASH COURSE IN SQL	439
The SELECT Command	440
The INSERT INTO Command	445

Contents

The UPDATE Command	446
The DELETE Command	446

Part II The User Interface

Chapter 9 **Advanced Forms and Dialogs** **449**

STANDARD USAGE OF FORMS	449
Forms as Objects	449
Reusable Forms	455
Forms as Object Viewers	460
Dynamic Control Creation	464
Data-Driven Forms	471
MDI FORMS	477
MDI Applications	478
Polymorphic MDI Containers	482
The Application Wizard	484
USING DRAG-AND-DROP	487
Automatic Drag-and-Drop	487
Manual Drag-and-Drop	489

Chapter 10 **Windows Common Controls: Part I** **499**

THE IMAGELIST CONTROL	501
Adding Images	502
Extracting and Drawing Images	504
THE TREEVIEW CONTROL	506
Setting Design-Time Properties	506
Run-Time Operations	508
Advanced Techniques	514
THE LISTVIEW CONTROL	523
Setting Design-Time Properties	524
Run-Time Operations	527
THE TOOLBAR CONTROL	536
Setting Design-Time Properties	537
Run-Time Operations	540
THE TABSTRIP CONTROL	544
Setting Design-Time Properties	544
Run-Time Operations	547

Contents

THE STATUSBAR CONTROL	549
Setting Design-Time Properties	549
Run-Time Operations	551
THE PROGRESSBAR CONTROL	554
Setting Design-Time Properties	554
Run-Time Operations	554
THE SLIDER CONTROL	555
Setting Design-Time Properties	555
Run-Time Operations	556
THE IMAGECOMBO CONTROL	557
Setting Design-Time Properties	558
Run-Time Operations	558
<i>Chapter 11</i> Windows Common Controls: Part II	561
THE ANIMATION CONTROL	561
THE UPDOWN CONTROL	563
Setting Design-Time Properties	563
Run-Time Operations	564
THE FLATSCROLLBAR CONTROL	565
THE MONTHVIEW CONTROL	566
Setting Design-Time Properties	567
Run-Time Operations	568
THE DATETIMEPICKER CONTROL	574
Setting Design-Time Properties	575
Run-Time Operations	576
THE COOLBAR CONTROL	578
Setting Design-Time Properties	579
Run-Time Operations	581
<i>Chapter 12</i> Other ActiveX Controls	585
THE MASKEDBOX CONTROL	585
Setting Design-Time Properties	585
Run-Time Operations	588
THE COMMONDIALOG CONTROL	589
The Color Dialog	591
The Font Dialog	592
The Printer Dialog	595
The FileOpen and FileSave Dialogs	597
Help Windows	604

THE RICHTEXTBOX CONTROL	606
Setting Design-Time Properties	606
Run-Time Operations	607
THE SSTAB CONTROL	616
Setting Design-Time Properties	616
Run-Time Operations	617
THE SYSINFO CONTROL	620
Properties	620
Events	621
THE MSCHART CONTROL	622
Setting Design-Time Properties	623
Run-Time Operations	624

Part III Database Programming

Chapter 13 **The ADO Object Model** **629**

THE CONNECTION OBJECT	631
Properties	631
Methods	636
Events	639
The Errors Collection	641
THE RECORDSET OBJECT	642
Properties	643
Methods	653
Events	671
THE FIELD OBJECT	674
Properties	674
Methods	679
The Fields Collection	681
THE COMMAND OBJECT	682
Properties	682
Methods	684
THE PARAMETER OBJECT	686
Properties	687
Methods	688
The Parameters Collection	688
THE PROPERTY OBJECT	689

Contents

ADO 2.1 DDL AND SECURITY EXTENSIONS	690
The Catalog Object	692
The Table Object	693
The Column Object	694
The Index Object	694
The Key Object	695
The View and Procedure Objects	696
The Group and User Objects	697
<i>Chapter 14</i> ADO at Work	699
SETTING UP A CONNECTION	699
Building the Connection String	700
Opening the Connection	702
Asynchronous Connections	705
PROCESSING DATA	707
Opening a Recordset Object	707
Basic Operations on a Database	713
Optimistic Client-Batch Updates	719
Using Command Objects	724
Using the DataEnvironment Designer	726
ADVANCED TECHNIQUES	732
Recordset Events	732
Asynchronous Operations	738
Stored Procedures	740
Hierarchical Recordsets	748
<i>Chapter 15</i> Tables and Reports	757
THE DATACOMBO AND DATALIST CONTROLS	757
Setting Design-Time Properties	758
Run-Time Operations	760
THE DATAGRID CONTROL	764
Setting Design-Time Properties	765
Run-Time Operations	769
THE HIERARCHICAL FLEXGRID CONTROL	783
Setting Design-Time Properties	784
Run-Time Operations	786
THE DATAREPORT DESIGNER	793
Design-Time Operations	794
Run-Time Operations	800

Part IV ActiveX Programming

<i>Chapter 16</i>	ActiveX Components	813
	INTRODUCING COM	813
	A Long Story Made Short	813
	Types of COM Components	815
	CREATING AN ACTIVEX EXE SERVER	820
	The Basic Steps	820
	The <i>Instancing</i> Property	823
	Passing Data Between Applications	828
	Error Handling	836
	Components with User Interfaces	840
	Compatibility Issues	843
	Registering a Component	851
	Shutting Down the Server	852
	Persistence	853
	CREATING AN ACTIVEX DLL SERVER	859
	In-Process Components in the Visual Basic IDE	859
	Differences Between In-Process and Out-of-Process Components	861
	Embedding Forms in a DLL	864
	Performance	867
	Extending an Application with Satellite DLLs	869
	MULTITHREADED ACTIVEX COMPONENTS	875
	Threading Models	875
	Multithreaded ActiveX EXE Components	876
	Multithreaded ActiveX DLL Components	882
	Multithreaded Visual Basic Applications	883
	REMOTE ACTIVEX COMPONENTS	890
	Creating and Testing a Remote Component	891
	Configuring DCOM	895
	Implementing a Callback Technique	900
<i>Chapter 17</i>	ActiveX Controls	905
	ACTIVEX CONTROL FUNDAMENTALS	905
	Creating the UserControl Module	906
	Running the ActiveX Control Interface Wizard	908
	Adding the Missing Pieces	912

Contents

THE USERCONTROL OBJECT	917
The Life Cycle of a UserControl Object	918
The Extender Object	919
The AmbientProperties Object	922
Implementing Features	925
REFINING THE ACTIVEX CONTROL	931
Custom Properties	931
Container Controls	942
Transparent Controls	944
Lightweight Controls	946
Data Binding	950
Property Pages	955
The Tricks of the Masters	963
ACTIVEX CONTROLS FOR THE INTERNET	967
Programming Issues	968
Component Download	973
Licensing	976
 <i>Chapter 18</i> ADO Components	 979
DATA SOURCE CLASSES	979
The <i>GetDataMember</i> Event	980
Support for the <i>DataMember</i> Property	984
Custom ActiveX Data Controls	987
DATA CONSUMER CLASSES	990
Simple Data Consumers	991
Complex Data Consumers	995
OLE DB SIMPLE PROVIDERS	999
The Structure of an OLE DB Simple Provider	1000
The OLE DB Simple Provider Class	1001
The Data Source Class	1008
The Registration Step	1009
Testing the OLE DB Simple Provider	1011
THE DATA OBJECT WIZARD	1012
Preparing for the Wizard	1012
Creating the Data-Bound Class	1015
Creating the Data-Bound UserControl	1018

Part V Internet Programming

<i>Chapter 19</i>	Dynamic HTML Applications	1025
	A QUICK COURSE ON HTML	1026
	Headings and Paragraphs	1027
	Attributes	1029
	Images	1030
	Hyperlinks	1031
	Tables	1032
	Styles	1033
	Forms	1035
	Scripting	1037
	AN INTRODUCTION TO DYNAMIC HTML	1042
	Main Features	1043
	Tags	1044
	Properties	1045
	Properties and Scripting	1047
	Text Properties and Methods	1049
	Events	1051
	THE DHTML OBJECT MODEL	1055
	The Window Object	1056
	The Document Object	1061
	The TextRange Object	1064
	The Table Object	1067
	THE DHTMLPAGE DESIGNER	1068
	A First Look at the DHTMLPage Designer	1068
	Programming DHTML Elements	1072
	DHTML Applications	1079
	REMOTE DATA SERVICES	1093
	DHTML Data Binding	1093
	Using RDS Objects	1099
	Custom Business Components	1103
	THE DHTML EDIT CONTROL	1108
	Installation	1108
	Properties and Methods	1108

Contents

<i>Chapter 20</i>	Internet Information Server Applications	1111
	AN INTRODUCTION TO INTERNET INFORMATION SERVER 4	1111
	Main Features	1112
	The Microsoft Management Console	1113
	Active Server Pages	1117
	THE ASP OBJECT MODEL	1122
	The Request Object	1122
	The Response Object	1130
	The Server Object	1136
	The Application Object	1140
	The Session Object	1142
	TheObjectContext Object	1146
	ASP COMPONENTS	1147
	Using Components in ASP Scripts	1147
	Using Custom ASP Components	1148
	WEBCLASSES	1156
	First Impressions	1157
	WebClass Basic Techniques	1164
	The Professional Touch	1184
<i>Appendix</i>	Windows API Functions	1189
	A WORLD OF MESSAGES	1190
	Multiline TextBox Controls	1192
	ListBox Controls	1196
	ComboBox Controls	1199
	SYSTEM FUNCTIONS	1199
	Windows Directories and Versions	1200
	The Keyboard	1202
	The Mouse	1204
	THE WINDOWS REGISTRY	1208
	Visual Basic Built-In Functions	1208
	The API Functions	1210
	CALLBACK AND SUBCLASSING	1219
	Callback Techniques	1219
	Subclassing Techniques	1223
	Index	1235
